AtBackgrounds: *Employment Screening Simplified*

AtBackgrounds mitigates hiring risk for smart employers that not only understand the need to screen every employee, but also appreciate the benefits of a 100% compliant background check process.

The AtBackgrounds screening platform offers employers a powerful yet easy to use interface featuring advanced technology and built-in automation for faster results and cost savings.

Contact AtBackgrounds and learn how we can help develop the best background screening program customized to your specific needs.

AtBackgrounds will assess your organization's current screening process and provide improvement recommendations at no cost, no obligation.

AtBackgrounds Capabilities Summary

Features & Benefits
Sign up and start working within hours from any web enabled device - Full mobile support. No account setup or software license fees. Easy-to-read, compliant background check and drug screening reports -- Single platform access to all services.

Robust Product Offerings
AtBackgrounds' screening solutions feature the industry's most reliable criminal records databases, electronic connections to courts' records systems and a nationwide network of professional court researchers for effective criminal records coverage.

Intelligent Automation: Speed and Cost Savings
AtBackgrounds' intuitive interface minimizes unnecessary clicks and scrolling, and takes advantage of the latest advances in automated screening technology. Invite candidates to enter their own data, set deadlines and automatically track progress. AtBackgrounds' automated "e-mail verification first" approach results in faster response rates over telephone verifications alone. Direct connection to courts and extensive researcher network - Full nationwide and international coverage.

Paperless and Fully Compliant
E-signature enabled system with FCRA notifications and required state disclosures automatically generated and sent. FCRA and State reporting guidelines strictly followed. Prompt dispute resolution process for a positive candidate experience.

Technology, Security and HRIS / ATS Integrations
Reliable and Secure SaaS portal: Data at rest and in motion is encrypted. PCI compliant systems with multi-factor authentication security. XML background check gateway preintegrated with major Human Capital Management Systems.

Flexibility for Changing Needs
Easily manage authorized users and access privilege levels. Add or modify service packages. Extensive reporting features for better management. Live U.S.-based phone and email support with experienced screening professionals.
